International team internship (program summary)

Objective

Providing students with the skills necessary for effective functioning in international cross-functional teams and successful work in accordance with international standards of modern global corporations.

Participants

1. Students of Russian and foreign universities and colleges from various specializations.
2. Academic staff of educational institutions participating in the program.
3. Specialists of international companies represented in Samara region, resident companies of the Special economic zone and Zhiguli valley science park.

Format

During the short-term internship (4-6 weeks) students of Russian and foreign educational institutions solve practical problems of companies and develop real projects in international cross-functional teams. Special attention is paid to the development of the ability to work in an intercultural environment and project management skills.

Each team has a mentor from the employees of the company and a coordinator from the host institution. The working language of the teams is English.

During the internship visits to the enterprises of the Samara region and the cultural program are organized for the students.

Key stages

1. Introduction to the field of activity of the company in which the internship takes place.
2. Setting a practical task for the development of the project for the company.
3. Formation of international cross-functional teams.
4. Project work and analytics, intermediary presentation on the work done.
5. Final presentation of the projects.
